International wire, Cable, Tube & Pipe Trade Fairs FOR SOUTHEAST ASIA

The inaugural Wire Southeast Asia and Tube Southeast Asia 2007 trade fairs will introduce a host of cutting-edge technologies, products and solutions to the Southeast Asian wire, cable, tube and pipe sectors from a truly global slate of exhibitors. More than 350 exhibiting companies from over 30 countries including 8 national groups from Austria, China, France, Germany, Italy, Taiwan, United Kingdom and USA will make their presence felt at the trade fairs.

The meet addresses the dire need of wire lubricant products of manufacturers of lubricants, coatings and carriers for the wire drawing industry. The oils (from beef tallow etc) are expensive. The only global supplier of dry drawing lubricants, coatings and carriers serving solely the wire industry, Traxit International, is offering Boron-free coatings and other breakthrough products in the fair.

Also on display will a slew of next generation products like AccuScan 5000 diameter gauges that offer more than twice the usual measurement rate, the latest in software PLC and fieldbus technologies providing advanced functionality along with LaserSpeed 9000, which can measure both forward and reverse delivering better than 0.05% accuracy on all cable applications. Debuting at the fair is the LPSNH3 high frequency diameter measurement for the cable and plastic industries and SQM (Surface Quality Measurement and defect detection) for fine wires and cables. Other items will be nail machines, spooler for high-speed automotive wires production.

India's Gandhi Tubes will showcase a range of seamless steel tubes for hydraulics, high pressure diesel fuel injection, and automobile fuel lines and refrigerator condensers. Thermatool extends the capabilities of variable frequency HF welding to its HAZ Control Technology for achieving the best weld. Check out these and other ground breaking technologies for the wire and tube industry at the expansive fairs in Bangkok from 16 to 18 October, 2007. To get a detailed view of more products visit the sites

www.wire-southeastasia.com
www.tube-southeastasia.com

Visitors are required to pre-register their visit online at the respective shows websites by 1 October 2007. Alternatively, they can register at BITEC during the exhibition.

CONCURRENT SEMINAR

latest developments in non-ferrous wire and tube technology - 17, october 2007

Industry experts will share the latest developments in wire and tube technology in a seminar jointly organized by the International Wire & Machinery Association (IWMA) and International Tube Association (ITA). For more information on attending the seminar, please contact IWMA (info@iwma.org) or ITA (info@itatube.org).

ECONOMIC UPDATE

The latest World Bank issue of Thailand Economic Monitor indicated a GDP growth of 5% in 2006, with exports being a significant contributor to economic growth. Foreign direct investment (FDI) to Thailand grew at a scorching pace and the future indicates signs of a continuation of strong FDI growth. The government plans to invest in large-scale transportation infrastructure, lower the logistic cost to GDP ratio and add five additional lines to the subway system by 2012.

Steel Mills Need Spareage Seals

Spareage Seals Ltd. specialises in the manufacture of Hydraulic seals, Pneumatic seals, Rotary seals, and 'O' Rings. It is the leading seal manufacturer whose seals are used original equipment and replacement applications in a slew of industries ranging from steel plants to nuclear

& thermal power plants cement plants, hydraulic and pneumatic cylinders, gear box and motor manufactures. Spareage manufactures piston seals, rod seals, wiper, wear and bonded seals. Standard seals, fabric seals heavy duty seals, V-rings & O-rings too are made by the company.

In fact, Spareage provides total sealing solutions for the existing assemblies by designing special sealing profiles suitable to the existing grooves with minimum modifications in the parts. The recommended sealing profiles are specially designed according to the application parameters to overcome the failure.

Split seals are used to reduce downtime in replacing seals especially during shut down time, without removing heavy couplings or parts. These are for use in applications such as bearings mounted on shafts, gear box couplings and fly wheels of heavy equipment in various industries. Spareage can provide specially moulded split seals which should be used with a retainer plate.

Spareage has developed sealing solutions for hydraulic and rolling mills in many steel plants by offering customized sealing concept to overcome the existing problems by developing new sealing profiles with suitable material according to the working parameters. The company is thus is a one-stop solution for your sealing needs.

Forthcoming Events

- **WIRE TUBE 2007**
16-18 October, Bangkok, Thailand.
- **EXTRUSION SUMMIT 2007**
26-27 October, World Trade Centre, Mumbai.
- **Metalex 2007**
15-18 November, Bangkok, Thailand
