

SKM Galva

SKM Galva is part of 1200 Crore SKM Group established in the year 2003 as an OE Channel Partner of TATA steel for Galvanized Steel thus acting as a bridge between TATA Steel and OE customers. The Company is promoted by Shri Kirti Shah who hails from a business family and has more than 40 years experience as a businessman.

SKM Group is among the fastest growing business houses associated with the House of TATA since 1975. It has been diversified into various business activities and has grown into an organisation of nearly 22 companies engaged in business activities like Manufacturing Imports, Exports, Trading etc

Products :

- Galvanised plain spangled
- Galvanised plain with differential coating
- Galvanised plain zero spangle
- Galvanised plain skin passed
- Galvannealed (GA)

Characteristics : Galvanized (GA) Steels

Formability :

Galvanized has good formability characteristics compared to GI & EG steel because of optimum iron content (8-12%) in the coating. GA Steel has excellent zinc tenacity and the Fe-Zn alloy layer is so thin that the coating does not exfoliate.

Paintability :

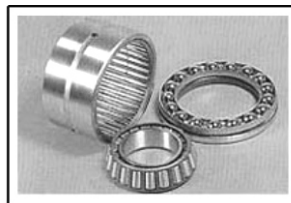

Paintability of GA is better than GI. GA with a matte and uniform finish is suitable for furniture, white goods and automobile application

Corrosion Resistance :

Hot-Dip Galvanized Sheet offer the highest corrosion resistance. Cold -Rolled Strips, from the world class 1.2 MTPA Cold-Rolling Mill, are capable of being used in every steel based product and application ever imagined. And what's more, it comes in dimension, thickness and tolerance that one never thought possible before. Tailor made to meet not just the needs of the present day, but of the future as well.

Infrastructure :

SKM Metal Processor Pvt. Ltd, which is an ISO 9001-2000 certified service center is located at Taloja, New Mumbai. The state-of-the-art TATA Steel authorised service center spans across 23000

sq.ft. equipped with HR, CR & GP coil processing units which can cater to 6000 tons of tailor cut material per month in the thickness range of 0.40mm to 3.00mm. The highlight of the service center is its potential to store 5000 tons of inventories at any given time to take care of the planning of our esteemed customers with a mission to deliver better services by reducing lead time. SAP enabled system at the center monitors the entire material movement.

Since its inception, SKM Group has been establishing its presence in manufacturing, imports, exports, trading etc. The group has taken expansive technological strides and is now considered a trusted and a dependable player in Indian business.
